

This listing of the claims replaces all prior versions and listings of claims in the application.

- Claim 1. (Cancelled) A liquid termiticide composition comprising
- i) a pyrethroid and
  - ii) a neonicotinoid selected from the group consisting of imidacloprid, nithiazine, thiamethoxam, dinotefuran, nitenpyram, thiacloprid and clothianadin.
- Claim 2. (Cancelled) A composition according to claim 1, wherein the pyrethroid is selected from the group consisting of bifenthrin, cypermethrin, zeta cypermethrin, lambdacyhalothrin, betacyhalothrin, alphacypermethrin, tralomethrin, deltamethrin, cyfluthrin, beta-cyfluthrin, esfenvalerate, fluvalinate, etofenprox and permethrin.
- Claim 3. (Cancelled) A composition according to claim 2, wherein the pyrethroid is bifenthrin.
- Claim 4. (Cancelled) A composition according to claim 1, wherein the composition comprises bifenthrin and imidacloprid.
- Claim 5. (Currently Amended) A liquid termiticide composition for controlling termites at a locus where termite control is needed or expected to be needed [according to claim 4], the composition comprising
- i) bifenthrin and
  - ii) imidacloprid,
- wherein the amount of bifenthrin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition and the amount of imidacloprid is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition.
- Claim 6. (Withdrawn) A composition according to claim 1, wherein the composition comprises bifenthrin and clothianadin.
- Claim 7. (Withdrawn) A composition according to claim 6, wherein the amount of bifenthrin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition and the amount of clothianadin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition.

Claim 8. (Withdrawn) A composition according to claim 1, wherein the composition comprises bifenthrin and thiamethoxam.

Claim 9. (Withdrawn) A composition according to claim 8, wherein the amount of bifenthrin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition and the amount of thiamethoxam is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition.

Claim 10. (Currently Amended) A method for controlling termites comprising applying a termiticidally effective amount of a liquid termiticide composition [of claim 1] comprising

i) bifenthrin and

ii) imidacloprid

to a locus where termite control is needed or expected to be needed.

Claim 11. (Cancelled) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 2 to a locus where termite control is needed or expected to be needed.

Claim 12. (Cancelled) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 3 to a locus where termite control is needed or expected to be needed.

Claim 13. (Cancelled) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 4 to a locus where termite control is needed or expected to be needed.

Claim 14. (Currently Amended) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim [5] 10 to a locus where termite control is needed or expected to be needed and wherein the amount of bifenthrin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition and the amount of imidacloprid is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition.

Claim 15. (Withdrawn) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 6 to a locus where termite control is needed or expected to be needed.

Claim 16. (Withdrawn) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 7 to a locus where termite control is needed or expected to be needed.

Claim 17. (Withdrawn) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 8 to a locus where termite control is needed or expected to be needed.

Claim 18. (Withdrawn) A method for controlling termites comprising applying a termiticidally effective amount of a composition of claim 9 to a locus where termite control is needed or expected to be needed.

Claim 19. (Original) The method according to claim 10, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 20. (Cancelled) The method according to claim 11, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 21. (Cancelled) The method according to claim 12, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 22. (Cancelled) The method according to claim 13, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 23. (Original) The method according to claim 14, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 24. (Withdrawn) The method according to claim 15, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 25. (Withdrawn) The method according to claim 16, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 26. (Withdrawn) The method according to claim 17, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 27. (Withdrawn) The method according to claim 18, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.

Claim 28. (New) A liquid termiticide composition comprising

- i) bifenthrin and
- ii) imidacloprid,

wherein the amount of bifenthrin is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition and the amount of imidacloprid is equal to from 0.0005% by weight to 0.50% by weight of all components in the composition.

Claim 29. (New) A method for controlling termites comprising applying a termiticidally effective amount of the composition of claim 28 to a locus where termite control is needed or expected to be needed, wherein said locus is selected from a termite-infested structure, a structure that is expected to be termite-infested, or a location adjacent to said structures.
